

General description: Established in 2010, ScienceDialogue organizes and facilitates processes of citizen participation. The owners, Katharina Zöllner, Maren Schüpphaus and Sven Siebert, have long experience in lay-expert-dialogues and cooperate with science journalists to guarantee scientific soundness and comprehensibility of the information input into the dialogues.

Website: www.ScienceDialogue.de (in German)

Expertise: SCID has profound expertise in citizen participation. Key projects: “Jugendforen Nanomedizin”, youth juries on chances, risks and ethical aspects of emerging nanomedicine for the German Federal Ministry of Science and Education (www.Nano-Jugend-Dialog.de); EU-project IMPEL (Implementation and Enforcement of Environmental Law): Neighborhood Dialogues (in cooperation with dialog:impulse, Munich); Science et Cité, Switzerland: Round Table lakeshore planning in Thalwil/lake Zurich.

Facilities: facilitation equipment

Other European projects: none

Role in the project: SCID will contribute to the GAMBA project by:

- Preparing the patient and citizen panels by searching background information material (scientific and lay) and composing a handbook in lay language as input for the panels
- Searching experts as resources in the panels (scientific, ethical experts etc.)
- Organizing and facilitating the patient and citizen panels in Germany
- Coaching ARI and NUI to organize panels in their countries
- Compiling patients' and citizens' reports

- Evaluating dialogues
- Organizing and facilitating gender workshop

Workpackages responsibility: Public outreach / linking to society, citizen / patient panels
WP08 , **WP09** (bold = WP leader; WP = Workpackage)
